

Why HR Should Consider Agile Modern Data Delivery Platform

LYFTRON FOR HR

The need for integration with various systems such as payroll processing, administration, finance and IT motivated the HR departments to opt for sophisticated solutions that help them to handle the variety in the data.

Improved Employee Productivity

Less dependency on HR for information. With easy access to information employees can now plan their work more efficiently and effectively. Managers can now take more strategic decisions while maintaining integrity and accountability.

Efficient Integration

Easily integrate systems and share data in real time. You can utilize all of the features and benefits of a unified, HR solution by integrating payroll and timesheets. Utilize the power of data to offer unique benefits such as retirement plans, insurance coverage and more.

Data Consolidation

Gather data from all your sources. Attain uninhibited access to crucial data sources and achieve a sophisticated communication experience.

A TRANSFORMATIONAL STEP FOR BI ACCELERATION GUIDED BY THESE USE CASES

Agile Universal Data Model

Lyftron provides universal data model capability that enables changes from the source dynamically in the semantic layer and allows enterprises to avoid manual semantic data model changes.

Cloud Migration

A cloud data warehouse is connected and data migrated step by step

INSTANT BI WITH ZERO ETL/ELT

HEADACHES UTILIZING THESE USE CASES

Hybrid Cloud Management

Governed Data Lake Analytics

TOSS THE COMPLEXITY EMBRACE SIMPLICITY

Democratize data with ANSI SQL

ANSI SQL, Lyftron's data modeling layer, allows customers to define business logic so everyone in the organization can get reliable and consistent results no matter how SQL-savvy they are. This makes it possible for customers to avoid arguing over conflicting results and how data was pulled in the first place, and focus more on taking concrete actions based on results.

Hybrid cloud management

Build a hybrid cloud data warehouse that acts as a data bridge between leading cloud platforms, on-premise data warehouses, and data sources. With Lyftron, users can instantly access all data from different regions in a data hub, and migrate from legacy databases to a modern data warehouse without worrying about coding data pipelines manually.

Enterprise wide data catalog & data lineage

Enable full database object search guided by the principles of tagging, alias, and data set definition. Lyftron's platform empowers data analysts to collaborate with ease. The data lineage process is also simplified, enabling teams to monitor data sets usage to maintain a healthy warehouse.

Shorten time to insights

Empower data savvy users to find and prepare the data they need for analytics. Enable real-time access to any data source from any BI tool.

BI acceleration

Lyftron is a data layer for Business Intelligence that both simplifies data loading to a target Data Warehouse and also modernizes the traditional Data Warehouse architecture, adding true real-time query capabilities.

Enhance security of data

Register over 140+ types of data sources in one place. Choose the most valuable data sources and replicate them to the cloud.

DELIVERING ON THE PROMISE OF TRUE
